

Alabama Beef Cattle Improvement Association's

*36th Annual*

# *North Alabama Bull Evaluation*

★  
*Sale*

**Saturday, December 13 at 11:00 AM**  
**Cullman Stockyards, Cullman, AL**

## **SALE WILL FEATURE:**

- Complete Evaluation Results: ADG, WDA, Production Weights, Frame Scores
- Complete pedigree & EPD Data
- Carcass Ultrasound Data
- Breeding Soundness Documentation

**Angus      Hereford**

**Simmental      SimAngus**

**Auctioneer: Jarvene Shackelford,**  
**License #641**

November 7, 2008

On behalf of the consignors, the Alabama Beef Cattle Improvement Association, and everyone involved with the management of the North Alabama Bull Evaluation Center, I would like to welcome you to our 36<sup>th</sup> Annual Bull Test sale. The consignors to this year's evaluation have again made a commitment to offering their very best genetics to you, and the strength of this sale offering is a testament to that commitment.

We will be offering approximately 57 bulls in this sale. These bulls are the product of some of the finest, most progressive purebred breeding herds in Alabama and were developed in the rugged conditions of the North Alabama Bull Evaluation Center in Cullman, AL. I challenge you to evaluate these bulls closely, both on paper and in person. I honestly believe that you will find the strength of pedigree, powerful individual performance, and structural soundness of these bulls will compare to any sale offering found anywhere in America this year.

As you look through this catalog you will notice that we have made every effort possible to provide you with as much detailed information as you will need to make an informed decision about your next herd bull selection. The amount of documented performance information we make available is quite extensive; if you have any questions about how to make this information more meaningful to you please don't hesitate to ask anyone involved with this sale for assistance.

We hope you will make every possible effort to join us at the comfortable, well-heated sale facility at the Cullman Stockyards on December 13<sup>th</sup>. If, however, you will not be able to attend the sale in person, please feel free to contact anyone listed below for bidding assistance. We will handle your bid in the most confidential manner possible. We can also assist you in making trucking arrangements if needed.

The bulls will be available for your inspection at the Cullman Stockyard after noon on Friday, December 12<sup>th</sup>. We look forward to seeing you there!

Best regards,

A handwritten signature in black ink that reads "Gerry Thompson". The signature is fluid and cursive, with a long, sweeping underline.

Gerry Thompson  
Regional Extension Agent

## SALE TERMS AND CONDITIONS

EXCEPT FOR THOSE STATED IN THE BELOW TERMS AND CONDITIONS, THERE ARE NO WARRANTIES, EITHER EXPRESSED OR IMPLIED, AS TO THE MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE CATTLE BEING SOLD AT THIS AUCTION.

THE WARRANTIES AND GUARANTEES SET FORTH IN THE "TERMS AND CONDITIONS" ARE IN LIEU OF ALL OTHER WARRANTIES EITHER EXPRESSED OR IMPLIED, AND THE REMEDIES PROVIDED THEREIN SHALL BE THE SOLE AND EXCLUSIVE REMEDY OF THE BUYER, OR ANY PARTY CLAIMING THROUGH BUYER, FOR ANY BREACH OF WARRANTY OR GUARANTEE THEREIN PROVIDED, AND ALL OTHER OBLIGATIONS OR LIABILITIES.

**TIME AND LOCATION:** The North Alabama Bull Evaluation Center BCIA Bull Sale will be held **Saturday, December 13, 2008**, at the Cullman Livestock Auction, Cullman, AL.

**BIDDING:** All bulls will be sold to the highest bidder. The auctioneer will settle any disputes in bidding and his decision on such matters is final.

**TERMS:** The terms of the sale are cash or check unless credit arrangements, including any possible reservation of security interest, have been made by the interested party with the vendor, Alabama BCIA, prior to sale. The party financially responsible for each purchase will be the person's name that registered to the purchasing buyer number.

**PURCHASER'S RISK:** Each animal will become the purchaser's risk as soon as sold.

**CERTIFICATE OF REGISTRY:** A transferred certificate of registry will be furnished to the purchaser of each animal within forty-five (45) days following date of sale or receipt of full payment.

**HEALTH:** All bulls are eligible for interstate shipment; except as otherwise announced. Interstate health papers will be furnished for each animal requiring T.B. and Bangs test in accordance with Federal Regulations. All bulls have passed a test for Brucellosis within 30 days of the sale.

**ANNOUNCEMENTS:** Any changes from information of any kind in this catalog will be announced from the auction box and such announcements shall take precedence.

### BREEDING GUARANTEE

1. Every bull selling is guaranteed to be a breeder, with the exception of: a) injury or disease occurring after sale; b) Gross negligence or willful misconduct on the part of the purchaser.
2. **BULLS** are guaranteed breeders. Any bull which settles cows by natural service and passes a fertility test by competent veterinarians, mutually agreed upon by buyer and seller, during any 6 month period of trial (provided for in paragraph 2 of these sales terms and conditions entitled "Option and Privilege of Return and Adjustment") shall be considered a breeder. Guarantees with respect to ability to freeze semen shall be by separate agreement between the buyer and seller.

**IDENTIFICATION:** Seller offers each animal with a readable tattoo corresponding to its registration paper. Buyer agrees to check tattoo for accuracy. In those cases where a nickname is used, it shall be accompanied by the official registered name and number of the animal.

**OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:** All claims for adjustment must be made in writing within six months of the sale date.

In the event the animal is claimed to be a non-breeder, the animal may be returned to the farm of the seller if in good condition and complying with the health requirements of the seller's state. The seller shall be entitled to a six month trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months the seller is unable to prove the animal is a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the purchase price. The return of the full

purchase price, shall be in any case be deemed full satisfaction and settlement. Any expense incurred for transportation of an animal claimed to be a non-breeder shall be the responsibility of the purchaser, except that the seller shall be responsible for transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation.

If an animal is sold, and at a later date, proves not to be eligible for registration under the Association rules, the seller shall be obligated to make satisfactory adjustment on the purchase price to the buyer, or at the buyer's option refund the purchase price upon the return of the animal to the farm or seller. Any expense incurred for transportation shall be the responsibility of the purchaser, except the seller shall be responsible for the transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place.

If an animal is sold and through blood typing is proven to have incorrect parentage, as represented by the certificate of registration, and for which parentage can be determined, the seller shall be obligated to make a satisfactory adjustment on the purchased price to the buyer or, at the buyer's option refund the purchase price upon the return of the animal to the farm of the seller. Any expense incurred for transportation shall be the responsibility of the purchaser, except the seller shall be responsible for the transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place.

**RIGHTS AND OBLIGATIONS:** The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction. All persons attending the sale do so at their own risk. The seller, Alabama Cooperative Extension System, Auburn University or the Alabama BCIA will not assume any liability, legal or otherwise, for the safety of those attending this sale.

**MAIL AND TELEPHONE BIDS:** Mailed or telephone bids will be handled in a most confidential manner if you are unable to attend the sale personally. Please contact the Auctioneer (Col. Jarvene Shackelford), Michelle Elmore, Kent Stanford, or Gerry Thompson.

**BUYER NUMBERS:** On the day of the sale, prospective bull buyers are asked to acquire a buyer number from the front desk in the Cullman Livestock Auction

## DEFINITIONS AND ABBREVIATIONS

Birth Wt:	Weight taken before the calf is 24 hours old.
Adj. Weaning Wt.:	Weaning weight adjusted to 205 days and adjusted for age of dam.
ADG:	Average daily gain on 84 day test. ADG ratio determined within breed group and age group. Ratio above 100 indicates ADG above group average.
WDA:	Weight per day of age at the end of test. WDA ratio is determined within breed group and age group. A ratio above 100 indicates a WDA above the breed group average.
F. Wt.:	Final weight of the bull at the end of the 84 day test period
Frame:	Frame Score using BIF formula.
Adj. Yearling Wt.:	Adjusted 365 day yearling weight (BIF formula used) for bulls on performance test.
Scrotal:	Scrotal circumference in centimeters taken at the end of the 84 day test period.
Yrl Ultrasound B Fat	Adjusted Ultrasound Backfat Thickness measured at the 12th and 13th rib in inches.
Yrl Ultrasound REA:	Adjusted Ultrasound Ribeye Area measured at the 12th and 13th rib in sq. inches.
Yrl Ultrasound %IMF:	Adjusted Ultrasound Percent Intramuscular Fat measured in the ribeye muscle. This may predict marbling in the ribeye, which determines USDA Quality Grade.
Final Index:	The final ratio within breed and test using an equal combination of ADG, WDA and EPD values.

**EXPECTED PROGENY DIFFERENCES (EPD):** The expected difference in performance of a bull's progeny when compared to the average progeny performance of all bulls evaluated. EPD's are reported in pounds and are directly comparable across all herds within a breed, but not across breeds. Several economically important traits in beef cattle have EPD's. Traits include:

**CALVING EASE DIRECT (CE):** Predicts the ease with which a bull's calves are born to first calf heifers. EPD's for calving ease are reported as deviations in the percent unassisted births. When comparing calving ease EPD of two sires, the larger EPD indicates a higher percent of unassisted births for calves sired by this bull. Available in the Angus, Hereford and Simmental breeds.

**CALVING EASE DAUGHTERS (CEM):** Maternal Calving Ease - The ease with which a bull's daughters calve as first calf heifers. EPD's for calving ease are reported as deviations in the percent unassisted births. When comparing maternal calving ease of two sires, the larger EPD indicates a higher percent of unassisted births for calves born out this sire's daughters. Available in the Angus, Hereford and Simmental breeds.

**BIRTH WEIGHT EPD (BW):** Predicts the difference in average birth weight of a bull's calves compared to calves of all other bulls evaluated. Compare the bull's EPD to the breed average to determine whether he is above or below average for birth weight EPD for his breed. If the birth weight EPD is higher than breed average, he will sire heavier calves at birth than the average bull calf born in 2007.

**WEANING WEIGHT EPD (WW):** Predicts the difference in average 205 day weight of a bull's calves compared to calves of all other bulls evaluated. Compare the bull's EPD to the breed average to determine whether he is above or below average for weaning weight EPD for his breed. If the weaning weight EPD is higher than breed average, he will sire heavier calves at weaning than the average bull calf born in 2007.

**MATERNAL EPD:** Maternal (Pure Milk) EPD predicts the difference (due to milking ability) in **average 205 day weight** of a bull's daughter's calves compared to calves of all other bulls evaluated.

**YEARLING WEIGHT EPD (YW):** Predicts the differences in average 365 day weight of a bull's progeny compared to progeny of all other bulls evaluated. Compare the bull's EPD to the breed average to determine whether he is above or below average for yearling weight EPD for his breed.

If the yearling weight EPD is higher than breed average, he will sire heavier calves at yearling than the average bull calf born in 2007.

Carcass Backfat EPD (B FAT): expressed in inches, is a predictor of the difference in 12<sup>th</sup> rib backfat of progeny at a given end point.

Carcass Ribeye Area EPD (REA): expressed in square inches, is a predictor of the difference in ribeye area of progeny at a given end point.

Carcass Marbling Score EPD (MARB): The marbling score EPD can be used to select sires that will produce progeny with more marbling at a constant fat or age endpoint. The higher the marbling score EPD, the higher the amount of intramuscular fat in the ribeye muscle. The genetic correlation between marbling score and external fat at the 12<sup>th</sup> rib is nearly zero. This means breeders can select for increased marbling and will not have to worry about selecting for increased external fat. Intramuscular marbling contributes to the overall eating experience of beef. It is a significant component of juiciness and flavor of the beef product. Intramuscular fat plays a small role in tenderness of beef.

### Explanation of \*s under EPD Values

EPD Name	CE	CEM	BW	WW	Milk	YW
EPD Value	8.0	10.0	2.6	40.0	20.0	100.0
	***	****		**	*	****

Under each EPD value for a bull, there can be 0 to 4 \*s. The number of \*s indicate how that bull ranks within his breed.

- \*\*\*\* Top 10% or better ranking within breed for that trait
- \*\*\* Top 20% ranking within breed for that trait
- \*\* Top 30% ranking within breed for that trait
- \* Top 50% ranking within breed for that trait
- No \* Ranks between 50% and 100% percentile ranking for that trait

This can assist you in your selection decisions. Depending on strengths and weaknesses of your herd, you may need to concentrate on certain traits, stay in the middle of the road or not emphasize it at all. Remember, it is very important to match your genetics (EPDs) with your environment.

For example, if you have a commercial herd where you are not keeping replacement heifers, there is no need to emphasize Milk or CEM. Those traits are expressed in daughters of that bull. You are not keeping daughters.

### \$ Values and Index Values

\$ Value and Index Value EPD values are a way of combining several EPDs together to come up with 1 value for a producer to look at. The individual EPD values are weighted according to importance through statistical methods based on industry market pressures and expressed in dollars. Below are the definitions of the values seen in the catalog:

**\$W** “Weaned Calf Value”, an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. **\$W** includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size. Useful for producers selling calves at weaning. (Angus only)

**\$F** “Feedlot Value”, an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires. Useful for producers retaining ownership and selling live, finished cattle. (Angus only)

**\$G** “Grid Value”, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires. Useful for producers selling on a carcass grid. (Angus only)

**\$B** “Beef Value”, an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny

of other sires. Basically a combination of **\$F** and **\$G**. (Angus only).

**BMI\$:** Baldy Maternal Index. For use in commercial herds using Hereford bulls in a rotational crossbreeding programs on Angus-based cows/heifers. This index maximizes profit with the assumption calves are retained through harvest and marketed through CHB LLC pricing grid. (Hereford only).

**BII\$:** Brahman Influence Index. Similar to BMI\$ except on Brahman-influenced females. Index places more emphasis on traits deficient in Brahman-cross cattle; such as fertility and age at puberty. Places less emphasis on traits Brahman-cross cattle excel at; such as growth and calving ease. (Hereford only).

**CEZ\$:** Calving Ease Index. Emphasizes calving ease of Hereford bulls with yearling heifers. (Hereford only).

**CHB\$:** Certified Hereford Beef Index. This is a terminal sire index. Assumes Hereford bulls are mated to British-cross cows and sold on a CHB LLC pricing grid. (Hereford only).

**API** "All Purpose Index", an index value expressed in dollars per head, evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield. (Simmental only)

**TI** "Total Index", an index value expressed in dollars per head, evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield. (Simmental only)

For selection of breeding stock, it is important to know how EPD values for an individual animal compare to current breed averages. Average non-parent EPD values for some economically important traits are found in the tables below, These averages are useful for making comparisons within breeds.

### AVERAGE EPDs FOR 2007 BORN ANIMALS FROM 2008 BREED SIRE SUMMARIES

Breed	CE	CEM	BW	WW	Milk	YWT	SC
Angus	5.0	7.0	2.2	44.0	21.0	80.0	0.41
Hereford	-0.1	0.6	3.6	41.0	16.0	67.0	0.6
Simm Comp	n/a	n/a	0.0	26.1	3.1	50.0	n/a
Simmental	6.5	2.3	1.3	32.2	4.6	57.0	n/a

Breed	Carc BF	Carc REA	Carc Marbling	Indexes			
				\$W: 24.3	\$F: 22.8	\$G: 20.2	\$B 37.8
Angus	0.01	0.12	0.27	BMI\$: 15.1	CEZ\$: 14.2	BII\$: 14.2	CHB\$: 17.6
Hereford	0.002	0.17	0.03	API: 101	TI: 61		
Simm Comp	0.04	-0.12	0.28	API: 100	TI: 60		
Simmental	0.01	0.04	0.07				

## Care of Newly Purchased Performance Tested Bulls

Several management practices should be observed when newly purchased bulls are brought home. These practices can help to ensure that each new bull has a long and productive future with good productive performance.

1. **Feeding:** This is a young calf (13 to 16 mo. old) that still has a lot of growing to do. Feed this young bull well. Feeding 5 to 10 pounds of grain and 1 to 2 pounds of a protein source will assist him in the completion of the growth process. Continue to supplement this young bull during and after the breeding season.
2. Only use this young bull in a 45 to 60 day restricted breeding season. Observe him closely to see if he is servicing females properly.
3. Young bulls should be limited to a minimum number of cows to service. The number is decided by his age. The following guidelines can be used:

Bull's Age	No. of Females
12-15 months	10 to 12
15-18 mo	12 to 18
18-24 mo	18 to 25
24 mo and older	25 to 35

4. Place young bulls in well fenced lots before and after the breeding season to keep bulls away from cows in heat. There should be shade and plenty of clean water in each lot. Provide free-choice minerals and routinely treat for parasites.
5. Remember bulls are guaranteed by the consignors to be breeders only if they are managed correctly after the sale.
